

 **HIGHFIELD** 2024

#DARETOEXPLORE

#DARETOEXPLORE WITH HIGHFIELD...

Highfield’s state-of-the-art production facility is located in Weihai, China. Under European management, Highfield Boats has a rigging facility in the USA with support offices in Michigan and the European head office based in France.

With around 47,000 boats delivered globally since the brand’s beginning in 2011, Highfield Boats is now the world’s number one in the RIB tender sector and a global player in the 5 metres + sector. Performance and strength have always been at Highfield’s core. The brand has focussed on these two key values above anything else. Highfield’s hulls are dry-riding, very seaworthy and always over-built.

Their reputation for durability is now world-renowned. The heavy-duty approach to design and build allows both leisure and commercial owners to have the confidence needed to go that extra mile and to tackle conditions avoided by many others. As such, Highfield has been chosen time and again as the support boat of choice for prestigious events worldwide, with fleets up to 50 strong. From Vendee Globe to the Invictus Games, Pan Am Games, Extreme Sailing Series, ORC Championships, TP52 & The Route Du Rhum.

Sustainability is also a huge part of Highfield’s DNA. All of the hulls and structures are built in aluminium, which is infinitely recyclable. In addition, Highfield powder coat in an enclosed area to ensure that their footprint remains low from the beginning of the manufacturing process through to the end of each product’s life. With now over 48 distributor countries and a worldwide dealer network, Highfield owners can be confident any support they need will always be on hand.

CONTENTS

Brand Timeline	4-7
Ultralite Range	8-11

THE
Ultralite Range are single deck dinghies, created always keeping weight in mind. Their light weight make them a real alternative for those who may have chosen a soft bottom tender in the past but would prefer a hard hull for its performance. Ultralite tenders are roomy and strong, yet light and easy to transport.

These little boats can be launched and recovered by a single man and are easy to be transported on a roof rack. The Ultralite's are made of 2.5mm thick powder coated marine grade aluminium for the hull and 1100 Dtex fabric for the inflatable tube.

BECAUSE WEIGHT DOES MATTER

- Tow bridle points
- Anti-slip deck
- Light weight rubbing strake
- Full length keel guard
- Under seat bag
- Highfield dry bag
- Foot pump, oars, repair kit
- EVA

OPTIONAL EXTRAS

- Extra seat
- Boat cover

THE

Classic Range offers extra levels of comfort in this double deck hulled dinghy that will keep your feet dry. The hulls of the Classics are built of 2.5mm thick powder coated marine grade aluminium. The tubes are made of 1100 dtex coated fabric.

The high quality finish and luxury look belies the fact that this range of tenders has been designed to work hard. A durable aluminium hull coupled with full length keel guards make these ideal for those beach-hopping days with friends and family.

The optional FCT console or GT console options allow forward steering control for increased comfort and greater ease of navigation.

These options offer a more luxurious tender experience whilst still keeping the weight down.

The large weight savings achieved compared to equivalent GRP tenders means you'll enjoy impressive performance with smaller engines, all combined with excellent payload capacities

2023 also welcomes the arrival of the Classic E Range, modified for and powered by ePropulsion. This addition means the Classic range really does offer a tender for everyone.

CONSOLE OPTIONS CL340 & UP

FCT CONSOLE

The FCT console package is a perfect addition to any Classic 310 up to Classic 380 model giving you an additional level of comfort and enjoyability for your day on the water. The rear bench seat with high backrest and closed cell foam cushions which won't hold water, are perfect for a comfortable day exploring. The console helm is an open style design giving you unprecedented legroom in a boat of its size while a carbon dash with LED switches and branded steering wheel add a dash of style. An electrical package including led flush mounted switch panel, navigation lights and bilge pump are all standard.

WEIGHT: 36kg / 80lbs CAPACITY: 100l / 3.5 cu ft

GT CONSOLE

The NEW "Grand Tour" GT version console option combines lightweight and performance of the Classic line but with more comfort and styling from the luxury Sport boats for a perfect combination of reliability and styling. The Classic GT is available for CL340 and up, turning the Classic into an easy handling runabout, perfect for having fun when you've anchored for lunch.

CONSOLE WEIGHT: 25.5kg / 56lbs FOLDING SEAT WEIGHT: 20kg / 45lbs

CLASSIC E RANGE

**HIGHFIELD
GOES**
electric ⚡

The World's best selling tender now has an electric power option. Our partnership with ePropulsion has produced the perfect silent tender range. From 3.1m-3.8m, the Classic that is loved and trusted by so many will be available with 1-7Kw power options, providing easy charging and ultimate independence for the cruising vessel.

The ePropulsion Electric Outboard Motors provides clean, efficient & reliable power, suitable for saltwater and freshwater. They create no messy fuel or oil leaks and are exhaust-free, making every trip safe, pleasant & eco-friendly. Lightweight & compact, it is easy to lift, transport and store ashore or onboard.

THE

port range of high quality boats offers a choice from 3 metres up to 9 metres and combines all of our hull design expertise with an interior that you demand. Nothing has been sacrificed in the design of this range. Top quality materials are the hallmark of what we do and we have not compromised.

Hull deadrise angles ranging from 20 degrees on the 3 metre going through to a huge 26 degrees on the 600 and up will give you assurance in the toughest conditions. The additions such as EVA teak throughout, superb diamond stitched upholstery, fridges, showers and bathing platforms on our larger models will allow you to enjoy each day to the maximum.

With the impermeable qualities of our aluminium hulls there's no need to worry about gelcoat chips, or putting the boat on a beach or trailer. All Highfield Sport RIBs are easy to tow, launch and recover due to their light weight and integrated davit lifting eyes. Your Sport will not delaminate or absorb water over time, retaining the same agile performance in 10 years time as the day you collected it.

The Highfield Boats Sport range offers the very best solution for your requirement. Low weight garage tender or runabout, through to an offshore mile crunching cruiser.

* boat, console, standard seating, sundeck & roll bar only

THE

Patrol range of commercial quality RIBs are designed to work both excellently as a long distance family cruiser or a hardcore work boat. Built to withstand the toughest of conditions.

The hull is built from 5083 aluminium plates with 6 and 10mm stringers. With their super deep V, wide chines and large diameter tube, they offer high manoeuvrability, high safety and a soft dry ride even in the roughest conditions.

The range offers something for almost every requirement, from Sailing club support to Police and Rescue applications.

The Patrol boats carry large loads and plane quickly and easily with little horse-power. For charter boat and commercial operators, the modular set-up option means that we can build a layout that suits your needs. These boats are ideal pursuit craft or work boats and can be configured with different seating and console options.

With MCA rating & commercial coding available, the Patrol range is perfect for commercial chartering or working offshore too. When safety, toughness & reliability really matter, the Patrol range should be your first port of call.
